

PC Cabinets 19"

Simple and functional:

PC cabinets are made for use in the storerooms, laboratories, offices and other places, allowing to use mounted computer and monitor, without opening the door. This prevents equipment from dust and moisture getting in the cabinet, and provides reliable security to mounted equipment.

Monitor part

Upper side of the cabinet is 12U height and fits almost all popular monitor sizes.

Controlling part

Middle section is 4U height, and it is made for keyboard mouse or other controller, for easy and fast access and control of mounted PC or server.

Storage part

Storage part is 20U height, and this part can be used for server, PC, printer, UPS or other equipment.

Side panels

Four removable side panels provides full access to the rear part of the equipment, and makes installation easy and fluent.

All parts of the cabinet are lockable, and provides full protection for the equipment.

Colour

Light Grey (RAL7035) or Black(RAL9005).
