

VENT-IP-W Filter for fan with Rain-Resistant Hood

Fan filters are used to provide an optimum climate in enclosures and cabinets with electrical/electronic components. The interior temperature of an enclosure can be reduced by channeling cooler filtered outside air into the enclosure thus expelling heated internal air. The resulting airflow prevents formation of localized hot pockets in installations and protects electronic components from overheating.

Technical Data :

Article :	VENT-IP-W
Size	150×148×55mm
Note	without fan
Installation Way	Screw mounting or adhesive tape mounting
Filter mat	G4 acc. to DIN EN 779, filtering degree 94%
Filter material	new ABS material confirm to RoHS
Protection class	IP55
Mounting frame	screw fixing type, easy to open the cover
Fan size matched	120 x 120mm
weight	0,156 kg (Net)

ORDERING INFORMATION :

PART NUMBER	DESCRIPTION	UNIT
VENT-IP-W	Filter for Fan With Rain-Resistance Hood 150×148×55mm IP55	Pcs
